

FATHOPES ENERGY

Sustainable fats, oils and grease solutions since 2010

KEPENTINGAN MENGUTIP **MINYAK MASAK TERPAKAI?**

Kesan sampingan pelupusan minyak masak
terpakai dengan cara yang salah akan
merosakkan harta benda

mencemarkan
sistem pemparitan serta alam sekitar

[illegible]

Fathopes Energy telah mewujudkan penyelesaian kepada masalah ini.

Para peniaga makanan dapat memberi keutamaan kepada penyediaan makanan yang lebih **sihat dan enak** dengan penggunaan minyak masak baharu.

The background image shows a variety of fresh Asian food items arranged on a dark surface. There are several small bowls containing different types of dumplings (some fried, some boiled), bowls of yellow rice topped with shrimp or meat, bowls of green beans, bowls of sliced meats, bowls of stir-fried noodles, bowls of white rice garnished with herbs, and bowls of vegetable salad. A large bowl features two roasted duck legs. The overall presentation is vibrant and appetizing, illustrating healthy yet delicious meal options.

Sambil menjana **pendapatan yang stabil** menerusi pelupusan Minyak Masak Terpakai mereka

...disamping menyumbang kepada pengeluaran biodiesel:

Bahan api yang menjamin kelestarian alam sekitar

PENGENALAN

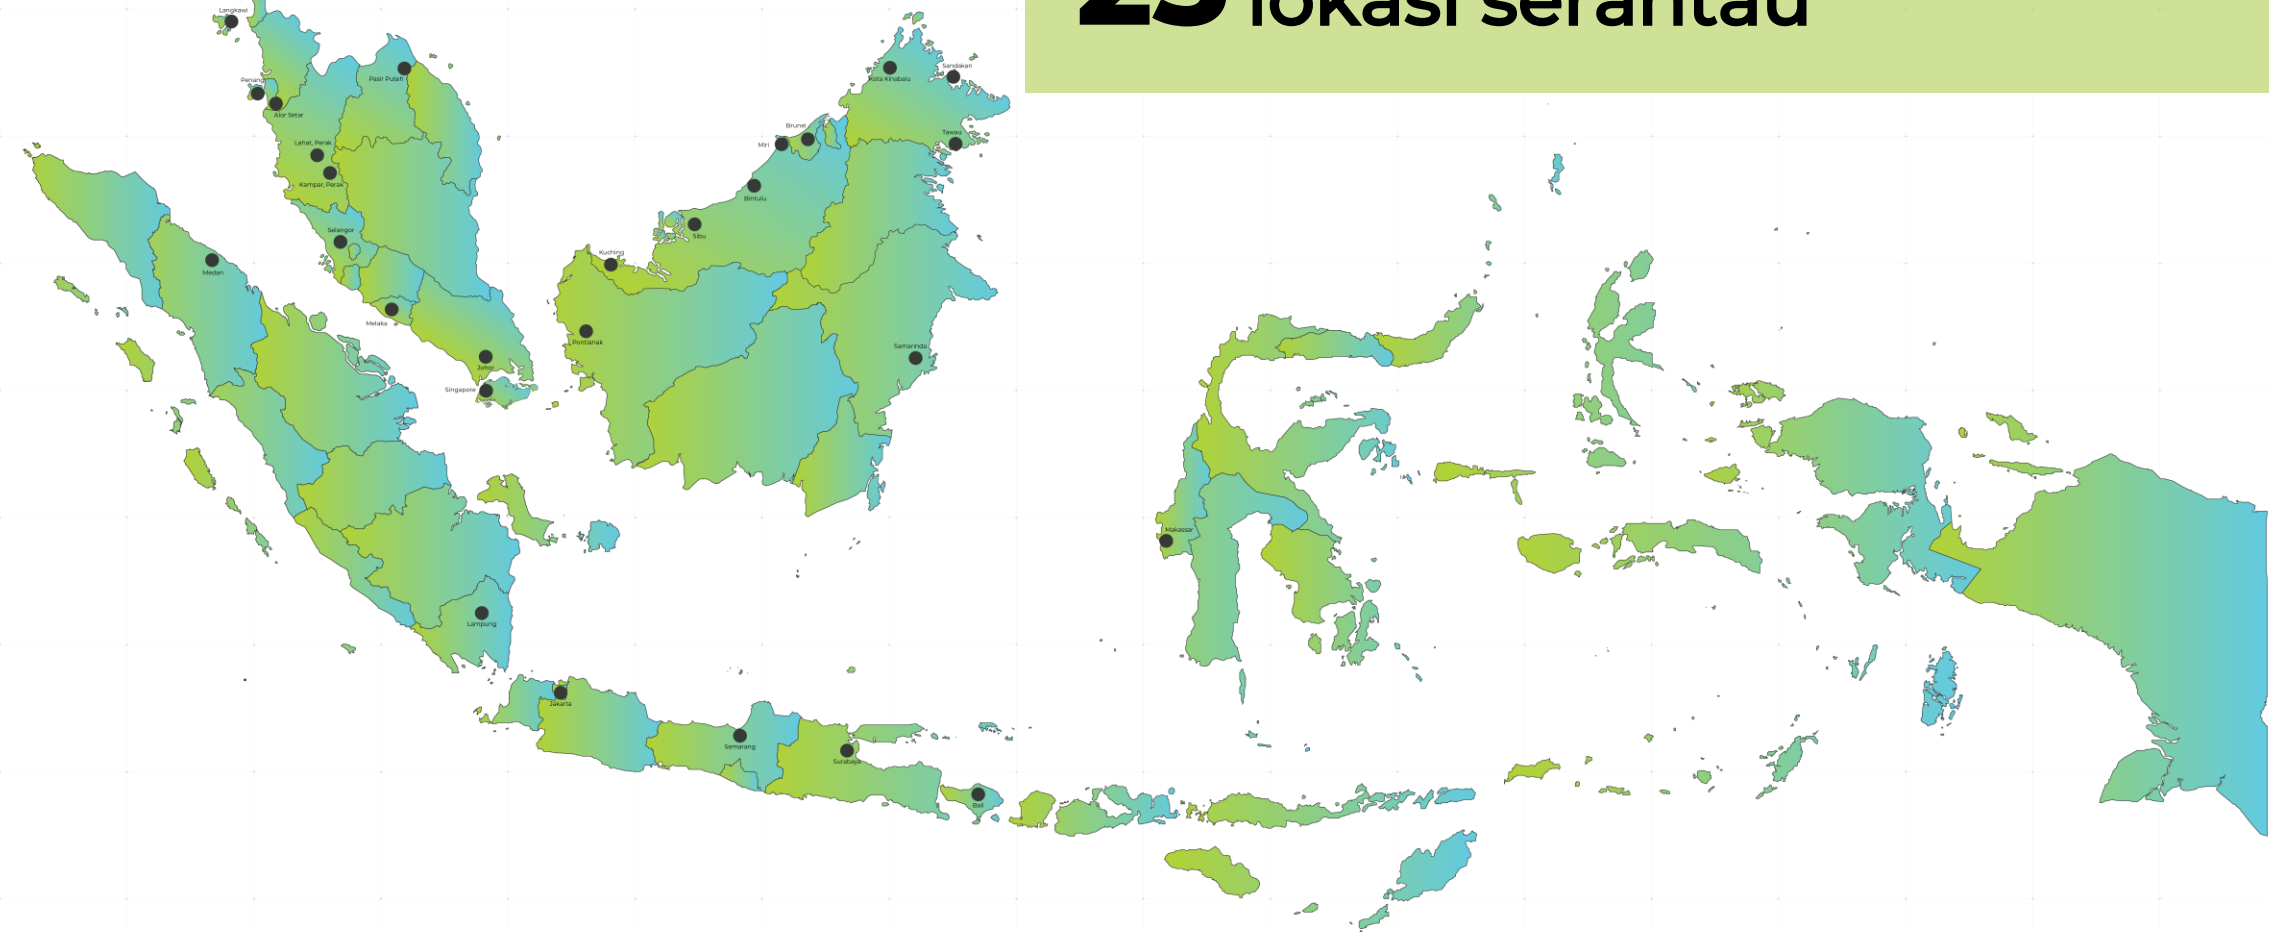

Memajukan pembangunan dan penyelesaian bagi minyak sisa semenjak tahun 2010

Tenaga kerja **profesional** **dan berpengalaman**

Depot di
23 lokasi serantau
